Welcome to PLANet B!

Thank you for following our unique climate change challenge project!

Through PLANet B, we aim to support youth workers and young people across Europe to take the Climate Change Challenge; by supporting them to develop their critical thinking and project solving skills, through solving unique Climate Change Challenges!

It has been a busy few months for the PLANet B partners – where we have completed all work on our Digital Breakout Challenges, uploaded all resources to our online platform; and started to deliver transnational and local piloting activities to test the resources we have developed.

In this newsletter, you will find out more about how we have engaged youth workers and young people through a virtual transnational training event; and you will hear about our next steps!

Digital Breakout Training!

To ensure that the PLANet B Digital Breakout Challenges can reach our youth target group, all PLANet B partners engaged youth workers and some young people in testing the Digital Breakout Challenges at a virtual transnational training event that was hosted online by The Rural Hub at the start of February 2022!

This 3-day transnational virtual training event was hosted on 31st January, until 2nd February 2022. This training event allowed all PLANet B partners to present their work in developing the Digital Breakout Challenges, to engage our end-user target groups of youth workers and young people in testing these Challenges, and to elicit vital feedback from these target groups on the quality of the challenges produced.

At this virtual training, partners presented the PLANet B project, an overview of what a Digital Breakout Challenge is, and then opened the session to presentations and testing of the Digital Breakouts!

This was a very positive and engaging virtual learning experience for all partners and participants. It gave us great insight into how these challenges can help to support young people to develop their awareness of climate change issues!

All Digital Breakout Challenges are available to access through our bespoke MOOC, developed by our expert partners, CARDET. To gain access to these resources, please visit:

What's Next for PLANet B?

The PLANet B project will come to an end in May 2022, but before then all partners will deliver the in-service training programme to local youth workers as part of our national piloting plans; and we will also host a series of Climate Change Challenge workshops with local young people to test our resources in our communities.
